Projects

White Water Rafting Website
Designed and built a multi-page responsive website using HTML and CSS with structured layouts and navigation.

Wander Uganda Travel Guide Website
Developed a destination travel website demonstrating responsive design and organized content structure.

Password Strength Checker - Python
Built a Python program that evaluates password security using scoring rules and blacklist checks.

Trip Budget Planner - Python
Created a Python application that calculates travel expenses based on transportation, duration, and daily costs.

Journal Program - C#
Developed an object-oriented journaling application that saves, loads, and displays journal entries using file storage.

Scripture Memorization Tool - C#
Built a C# learning program that progressively hides words to help users memorize text.
