

SARAH NAKANWAGI

Front-End Developer | Responsive
Web Design

About Me

Front-End Developer with hands-on experience building responsive websites and interactive applications using HTML, CSS, JavaScript, Python, and C#. Currently pursuing a Software Engineering degree at Ensign College, with a focus on web and computer programming, and gaining practical experience through the Code Queen program. Focused on creating clean, user-friendly interfaces and continuously improving development skills through real-world projects.

Projects and Practical Experience

White Water Rafting Website

Designed and built a multi-page responsive website using HTML and CSS with structured layouts and navigation.

Wander Uganda Travel Guide Website

Developed a destination travel website demonstrating responsive design and organized content structure.

Password Strength Checker - Python

Built a Python program that evaluates password security using scoring rules and blacklist checks.

Trip Budget Planner - Python

Created a Python application that calculates travel expenses based on transportation, duration, and daily costs.

Journal Program - C#

Developed an object-oriented journaling application that saves, loads, and displays journal entries using file storage.

Scripture Memorization Tool - C#

Built a C# learning program that progressively hides words to help users memorize text.
